Dawn Cardi

Introduction

Hi all! Thank you so much for purchasing this pattern. Please note that this pattern is purely for personal use, please do not distribute it. Reproduction and distribution of this pattern (including tutorials “based on” this pattern) are prohibited. You may sell your finished pieces but please always credit me as the designer!

I would love to see your WIPs and finished pieces so please don't hesitate to tag me @hollydoescrochet on Instagram! If you have any questions regarding this pattern, you can reach me at hollydoescrochet@gmail.com or through Instagram DMs.

Materials

- Hook 3.5mm
- yarn, [I used an acrylic wool blend \(400g\)](#)
- Darn needle
- Scissors
- Tape measure

Abbreviations

This pattern uses US terms

- Tr - triple crochet
- SC - single crochet
- sl st - slip stitch
- ch - chain
- RS - right side
- WS - wrong side
- sk - skip

Measurements

A = from shoulder to
shoulder

B = from top of shoulder to
waist/hip depending how
long you would like it

C = width of neck

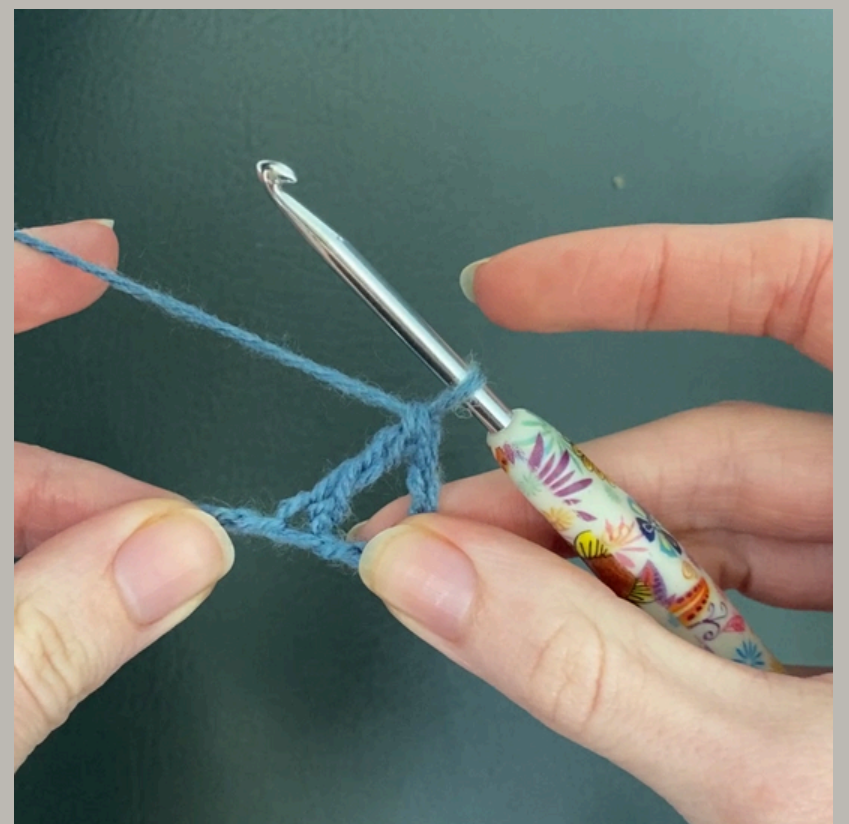

D = the circumference for
armhole

Back Panel

Foundation chain: chain a multiple of 4 and then chain an extra 5 for measurement A (from shoulder to shoulder)

Row 1: *(2 tr + ch 1 + 2 tr) all in 5th chain from hook then sk 3*

Repeat ** until the end of the row. When 2 stitches are remaining, sk 1 and tr in the final stitch

Back Panel

Row 2: ch 4 and *(2 tr + ch 1 + 2 tr) in the ch 1 space of the V below*

Repeat ** until the end of the row. Once at the end tr in the final stitch (the top of the ch 5)

Repeat row 2 until you reach measurement B

Front Panels

Time for some maths!

Measure how many clusters equal measurement C and A.

Then do $(A-C)/2 =$ top of front panel in clusters.

Now you have how wide the front panel should be in clusters, multiply this number by 4 to get how much you need to chain!

I wanted the neck to be 8 clusters (measurement C) so I took my total number of clusters (18 for measurement A) then subtracted 8 for the neck and halved it (5). So the top of the front panel was 5 clusters wide.

Then I did $4 \times 5 = 20$. So the top of my front panel is 20 chains!

Row 1: ch 5 then $*(2 \text{ tr} + \text{ch } 1 + 2 \text{ tr})$ all in 5th chain from hook then sk 3*

Repeat ** until the end of the row. When 2 stitches are remaining, sk 1 and tr in the final stitch

Front Panels

Row 2: now we need to increase! We will only be increasing on one side

To increase:

start the row as usual with ch 4 (2 tr + ch 1 + 2 tr)...

After the final cluster, put (2 tr + ch 1 + 1 tr) in the final space where you would normally put 1 tr

Completed rows 1-3

Row 3: start with ch 4 and 2 tr in the space you just created.

Continue as usual in the first full cluster.

Front Panels

Row 4: start the row as usual with ch 4 (2 tr + ch 1 + 2 tr)...

In the space of the (2 tr + ch 1 + 1 tr) from the previous row put a full cluster so (2 tr + ch 1 + 2 tr) and then add another tr to finish the row.

Front Panels

Row 5: ch 4 then $*(2 \text{ tr} + \text{ch } 1 + 2 \text{ tr})$ all in the space in the cluster in the previous row*

Repeat ** until the end of the row. Tr in the final space

(this row is a normal row without any increases, the same as the rows for the back panel.

Repeat rows 2-5 until you have the same amount of clusters as half of measurement A's clusters

Front Panels

Row 6: repeat row 5 (no increases) until the front panel is the same length as the back panel then fasten off.

Repeat rows 1-6 to create another front panel.

Sleeves

Foundation chain: measurement D

Row 1: *(2 tr + ch 1 + 2 tr) all in 5th chain from hook then sk 3*

Repeat ** until the end of the row.
When 2 stitches are remaining, sk 1 and tr in the final stitch

Row 2: ch 4 and *(2 tr + ch 1 + 2 tr) in the ch 1 space of the V below*

Repeat ** until the end of the row.
Once at the end tr in the final stitch (the top of the ch 5)

Repeat row 2 until you reach measurement B

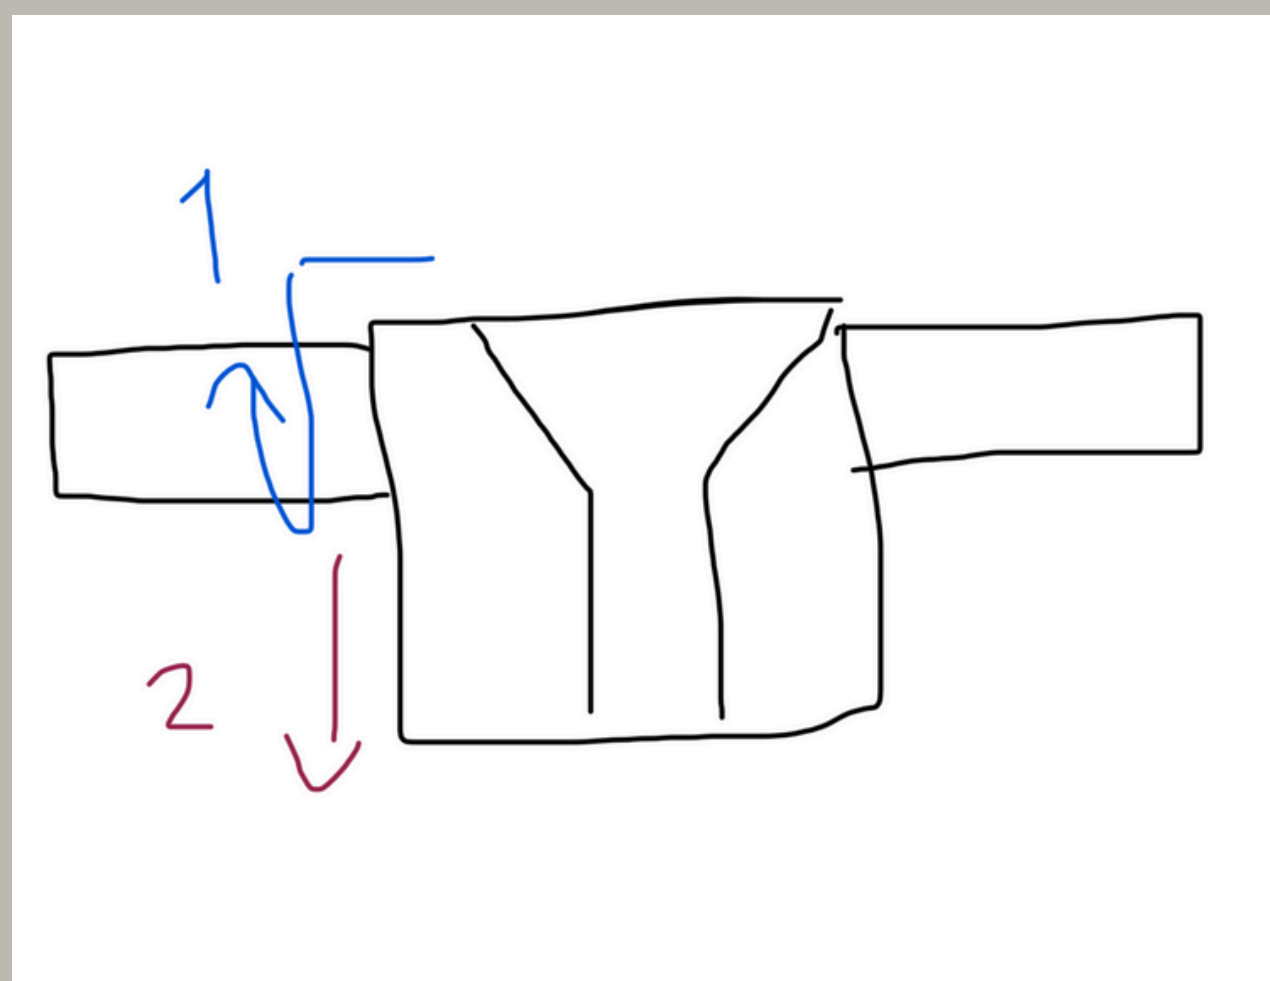

Sewing it all together

Sew the two ends of the sleeve together to make a sleeve then fasten off and repeat on the other leave.

Next sew together the top of the front panel and the back panel. Then continue around the sleeve, for this step make sure the seam is on the bottom and the sleeve is flattened so half is sewn to the back panel and half is sewn to the front panel.

Fasten off then sew from under the sleeve to the bottom of both the front and back panel.

Fasten off and repeat on the other side.

Border & Front Tie

Attach the yarn to any corner. HDC in each stitch along the edge of the cardigan.

Once you get to the part of the front panel where you start to decrease for the neckline ch 50. Turn then slip stitch into each chain. Once at the end continue to HDC around the border until you reach the same spot where you chained but on the opposite side. Ch 50 then turn and sl st into each chain. Continue to HDC in the border until you reach the first stitch. Sl st then fasten off!

You've finished!
