

bottom

Size:  
6" - (2 x thickness)

one slit is  
centred, the  
other offset  
by 1" (same  
on other side)

1.00"

7.50"

roof

Poke holes  
at the red xs.

*This is the number  
my the program  
measured, 4.5"  
would work just fine.*

4.61"

3.50"

3.00"

2.00"

3.00"

2.00"

6.00"

6.00"

Make the hole the right  
size for where you live.

Google local birding  
organizations for more  
info. In MB the  
recommendation was  
2.5" but that seems  
huge.

The gray boxes can  
be cut only through  
first layer to look  
nicer, or through all  
for easier cut.
