

Name: _____

Mr. Ham's *Media Arts Class* (Grade 10)

Assignment: Presentation Software Stop-Motion Animation

Theme: *TRANSFORMATION*

Using the technique explained in class, create an animation short that illustrates a transformation of some sort. Use basic geometric shapes to achieve this. For inspiration, review the works of Canadian filmmaker and animator, Norman McLaren.

Before beginning to animate, complete a storyboard which illustrates the concepts of your animation. Every major point of transformation should be clearly illustrated. Once your storyboard has been reviewed and approved, create a flip book that illustrates the lead up to every major point of transformation. Use the index cards provided to create your flip book. After your flip book has been reviewed and approved, start animating your sequence in either Microsoft PowerPoint, Google Slides, or Apple Keynote.

Be sure to check in if you have any questions or would like any feedback. We will be sharing our progress after six work periods. You will have 12 work periods to complete this assignment, use the time provided efficiently, this is not a quick process by any means. Formal presentation date to follow. Be creative, be original, have fun, and make something that you'll be proud to share!

Good luck!

Formal Presentation Date: _____
