

# BOM

| # | Part name                 | Dimensions           | QTY |
|---|---------------------------|----------------------|-----|
| 1 | Main layout               | attaches in STL file | 1   |
| 2 | Pick holder               | attaches in STL file | 1   |
| 3 | Pick holder pin           | attaches in STL file | 1   |
| 4 | Rail pin                  | attaches in STL file | 2   |
| 5 | Pick                      | attaches in STL file | 2   |
| 6 | Pick rail                 | attaches in STL file | 1   |
| 7 | 22mm wide polyester strip | 25cm                 | 1   |
| 8 | velcro strip              | 5cm                  | 1   |

Boil water and put in a bowl, put the Main layout part in the bowl for a few seconds, take out the part while it is flexible and wrap it around your hand so that it takes its shape

Repeat for the Pick rail part over the thumb

Check in which holes the rail coincides with the layout

Put the rail pin in place according to the desired angle

Place the rail on top of the layout using the pins

Lock the pick holder pin on the rail

Put the picks in place on top of the pick holder

Sew the velcro on top of the straps according to the desired size (after measuring on the hand)

Adjust the picks in the position and angle that suits you according to the guitar

When you're done fitting and assembling the parts, secure everything with strong contact adhesive

Enjoy!!!

# Wrist Guitar Pick

(STL only)
