

BOX

stay home and reuse

Purpose of the project

- To reuse and enhance the function of the a cartoon or shoe box.
- To rethink the way we can intrvene a cartoon box and its characteristics
- In this case we turned the cartoon/shoe box into a drawer organizer.
- it can be used and altered according to the users drawer size.

Tools Needed

- cardboard
- Shoebox(if available)
- Cutter
- Glue gun

Steps

- if the user doesnt have a ready shoe box and is reusing leftover card board, they can take the dimensions of their drawers and to get a perfect fit and make their own box.
- measure how wide the box is and cut smaller pieces of card board to fit it inside to create barriers to seperate the items.
- Glue the barriers to the box .

here you can see
the drawer with-
out organizing it
