

SKT2  
BAND signals are not connected on-board, only through the wristband itself.

TR2  
SSM6N36FE  
This is just my BEST GUESS of component type. Found a part with the same "NX" marking and pinout that makes sense given the rest of the circuit.

X1 case is grounded.  
XOUT is the pad at the X1 label.  
XIN is opposite corner of XOUT.  
Other 2 pads are GND.
